## **Chromebooks**

It is strongly recommended that parents purchase a chromebook for each student. At this time, Alberta Education has identified [three possible scenarios](#) for school re-entry. Access to a personally owned chromebook for each student would be advantageous for all three scenarios, in addition to minimizing the risk of cross contamination inherent to shared devices.

If you would like to purchase a device for your child, we typically suggest a Lenovo Chromebook. Having said that, a variety of devices will work and provide the tools that your child will need. Many stores stock Chromebooks at a reasonable price and you do not need to purchase a special kind of Chromebook. We have provided a link to BCOM Computers who offer affordable options and will ship directly to your home. Visit the GYPSD [BYOD Purchase Program](#) to view more options.

Thank you,  
Teachers at Niton Central School

Dear Parent/Guardian,

Research indicates that using technology in the school setting results in students who are more active, engaged and more likely to take pride and ownership in their learning. Regular technology use will increase self-advocacy skills including seeking assistance, conducting research, problem solving, and communication. Student confidence will grow as they rely less on the teacher and more on their own initiative for knowledge-creation.

We at BCOM Computer Centre are proud to have been chosen to partner with GYPSD to provide quality chromebooks at a reasonable price to the students within the Grand Yellowhead School Division.

To help you in this process we have put together an easy to navigate website or come visit us in our retail store.
